

✓ DVP-SC SERIES PLC

Compared to other slim and compact Delta PLC's, the SC series is the best MPU for motion control because of better high-speed pulse output and pulse counting functions.

- MPU points: 12
- Max. I/O points: 236
- Program capacity: 8K Steps
- Communication port: Built-in RS-232 and RS-485, compatible with MODBUS ASCII / RTU communication protocol.
- High-speed pulse output: Supports 2-point (Y10, Y11) independent high-speed pulse output of up to 100KHz (total bandwidth: 130KHz).
- Extra 2-axis interpolation
- Supports handy position control instructions.
- By ZRN (zero return), DRVA (absolute position) and DRVI (relative position) instructions, SC series is able to complete all kinds of motion controls by working with Delta servo.
- Built-in high-speed counter
