

✓ DVP-SV2 SERIES PLC

The new generation DVP-SV2 PLC is the high-end model of the Delta DVP-S series. It provides larger program capacities and data registers for more demanding and complex applications.

- 30k step program capacity
- 12,000 word data registers
- 4 x execution speed compared to the DVP-SV
- High-speed pulse output: 4 axes of 200kHz pulse output
- Supports 2 hardware 200kHz and 2 hardware 20kHz high speed counters
- Additional motion control instructions added to meet the applications that require high-speed and high-speed precision positioning control such as labeling machines, packaging machines and printing machines
- Offers linear / arc interpolation motion control
- Provides up to 16 external interrupt pointers
- Auto backup function to prevent losing programs and data even when the battery runs out
- Second copy function provides a backup for extra insurance in the event that one set of programs and data are damaged
- Up to 4-level password protection protects your source programs and intellectual property
